SUMMARY

B.Tech Computer Science (AI & ML) student at VIT Bhopal (CGPA: 8.85) with hands-on experience in **Python, Java, SQL, Machine Learning, Deep Learning, and Software Development**. Proficient in designing and deploying **CNNs, NLP models, and RESTful APIs**, with experience in **cloud platforms (AWS, Hugging Face), Docker, and version control (Git)**. Strong foundation in **Data Structures, Algorithms, Operating Systems, DBMS, and Computer Networks**. Actively seeking a **Software Engineer / AI Engineer / Data Scientist** role through campus placements.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, SQL

Machine Learning & AI: TensorFlow, PyTorch, Keras, Scikit-learn, NLP, Deep Learning, CNN, RNN, Transformers

Frameworks & Tools: Flask, Docker, Git, Hugging Face, PyQt, REST API development

Cloud & Databases: AWS, MySQL, PostgreSQL, MongoDB

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS, Computer Networks

PROJECTS

Minesweeper AI with CNN

2025

Deep Learning Project

Python, TensorFlow, PyQt

Developed a multi-task **Convolutional Neural Network (CNN)** for Minesweeper to predict safe moves, hints, and reasoning with **92% accuracy**.

Trained on a **custom dataset of 10,000+ gameplay states**, leveraging **supervised learning** and **reinforcement-based strategies**.

Integrated model with **PyQt GUI**, automating **100+ games** with real-time AI-assisted decision-making.

FinRisk – Loan Default Prediction API

2025

Machine Learning Deployment

Python, Scikit-learn, Flask, Docker, Hugging Face Spaces

Implemented a **classification model** on a **financial loan dataset (50,000+ records, 20+ features)** achieving **85% accuracy**.

Built and deployed a **RESTful API** with Flask handling **1,000+ JSON requests/day** for loan default prediction.

Containerized solution with **Docker** and hosted on **Hugging Face Spaces**, ensuring scalable and production-ready deployment.

SpeechSync – Real-time Speech-to-Text Synchronizer

2024

Speech Processing Project

Python, Whisper API, Google Speech API, HTML, CSS, JavaScript

Built a real-time **speech-to-text system** supporting **10+ languages** using Whisper API and Google Speech API.

Reduced **transcription errors by 25%** via **noise reduction** and adaptive speaker modeling.

Deployed a **web-based interface (HTML/CSS/JS)** enabling **50+ simultaneous users** to access synchronized captions during live lectures.

EDUCATION

VIT Bhopal University

Bhopal, MP

B.Tech. in Computer Science, Artificial Intelligence, CGPA: 8.85

Sept 2023 – Current
